THE SEAL KING DIFFERENCE:

→ HIGH PERFORMANCE PRODUCTS

Liquid asphalt sealers in conjunction with high performance polymer additives and silica sand give our material the durability to stand up to extreme climate conditions. Our crackfillers are premium hot rubber material preventing water penetration that can cause heaving and shifting asphalt.

→ PROPER MIXING EQUIPMENT AND FACILITIES

Seal King stores 6,000 gallons of liquid asphalt sealer which is then pumped into a 1,000 gallon full-sweep agitator tank. Silica sand, high performance additives and water are blended together. Liquid meters calculate the exact amount of each ingredient. All products are stored in our climate-controlled warehouse.

CONDITION OF SALE:

1. THE TOTAL CONTRACT SHALL BE PAID UPON COMPLETION. THANK YOU.
2. Any balance unpaid after 30 days is subject to a finance charge of 18% per annum (1.5% per month).
